HOW WE STARTED

In 2015, we recognized that the Audio-Visual manufacturing and integration industries were underserved with specialized recruiting resources. After a tremendous response from the C-level of leading industry brands such as Crestron, QSC, Biamp, Barco, Whitlock/AVI-SPL and others, HireSparks quickly claimed the title of the AV industry's go-to, specialized recruiting agency.

WHAT SETS US APART

Most Recruiting Agencies are meat grinders with 90% turn over every 2 years and they pressure their new employees to solicit every business within their region, regardless of their industry. They will happily promise you the moon with no real context, no existing relationships and no understanding of the market and technologies unique to our industry.

1. Our recruiters stay long-term, because we invest heavily in them, treat them like family and they are 100% remote.
2. We have delved deep into the nuances of the AV industry. We know the special relationships among AV manufacturers, dealer/integrators, distributors and end-users. We also know the differences between ProAudio, Commercial Integration and Rentals & Staging.
3. Because we serve the whole eco-system of our industry, which includes everything from new product development to installers and the entire sales chain, we have been networking with the whole community since day one. With over 90,000 conversations logged with passive, long term quality candidates, our internal database is top-of-class.
4. We don't just send our clients resumes. We are your brand ambassadors to the talent community. Every interview we do with a candidate prior to submittal is your opportunity for a positive introduction or affirmation of an existing fan.

WHY CHOOSE US

OUR MISSION

To help our client partners grow and thrive through constant networking, professional persistence and trying our very best to stay on top of the massive technology transformation of AV systems.

OUR PROMISE

We only promise our clients three things:

1. Integrity & Professionalism at all times.
2. Very low volume & very high quality candidate submittals.
3. To be your sincere brand ambassador to every candidate we interview for you.

WHAT WE DO

AV MANUFACTURERS

We present you a 'Best Practices' head-hunting service 100% dedicated to your industry, with the quantity and quality of candidates that you require to maintain and grow your Audio Visual Manufacturing division or business. No up-front fees, we bill you on your new employee's first day, with a 90 Day Guarantee.

AV INTEGRATORS

We are highly selective when agreeing to work with new clients in this category. As we do not recruit from our clients, we have to balance new business growth with a diminishing talent pool. If you are a market leader in your region, contact us ASAP at (833) 2HIREAV

100% DEDICATED TO AUDIO VISUAL RECRUITING
